

Consilex Idrofix

Water-based consolidating product for stone, brick and concrete

Liquid product based on lithium silicates, which was created for the protective, consolidating and porosity reducer treatment of concrete, mineral, brick and stone substrates. It guarantees optimal durability and adhesion strength, resistance to UV rays, chemical agents and mechanical stresses. The result of the application allows to obtain a rapid hardening of the surface as well as a revived and homogeneous appearance of the same. The product has a negligible environmental impact thanks to the low VOC content (<50 g / l) and is practically odorless.

CUSTOMS CODE: 3824 9970

COMPONENTS: Single-component

APPEARANCE: Liquid

AVAILABLE COLORS: Transparent

PACKAGING AND DIMENSIONS: Plastic can 5 kg - Plastic can 10 kg

FIELDS OF APPLICATION

Protective, reinforcing, water repellent treatments of concrete, mineral and stone supports. Specific product for revitalizing, simultaneously providing a great consolidation and an annulment of the dust produced in concrete supports, interstices, brick, stone or mixed arches, present in taverns, public premises and of historic monuments interest.

ALLOWED SUPPORTS

Plasters - Cement-based or lime-based mortars - Tuff - Mixed walls (bricks and stones) - Stone walls - Porphyry and natural stones - Bricks

PREPARATION OF SUPPORTS

The application surfaces should be clean, free of incrustations, dust etc. A preliminary wash with distilled water or steam it's recommended.

MODE OF USE

The support should be dry when applying. Apply the product as it is, with low pressure sprayer or brush with long bristles. Keep the substrate wet with Consilex Idrofix for at least 20 minutes during application. If applied on floors, wait 24 hours before passing on the treated support. The reinforcing contribution will be completed after 2-3 weeks of treatment.

APPLICATION METHODS

Low pressure airless nebulizer - Brush

TOOL CLEANING

Water

KEY FEATURES

 Density: 1.19-1.21 kg/l

 Solvent-free

 Nonflammable

 Temperature of use: +5 / +40 °C

TECHNICAL SPECIFICATIONS

The product doesn't create film

VOC content < **50 g/l**

Walkable after **24 h**

Minimum penetration time **30 min**

EN 1015-17
Chloride content < **0.05 %**

Depth of penetration **2-8 mm**

pH **11-12**

Active substance **25-26 %**

CONSUMPTION

From 0,20 to 1,00 kg of Consilex Idrofix per square meter of surface to be treated, based on the porosity of the support.

STORAGE AND CONSERVATION

Protect from freezing. Store the product in its original packing, in a fresh and dry environment, avoiding frost and direct sunlight. Inadequate storage of the product may result in a loss of rheological performance. Store the product at a temperature between +5°C and +35°C.
