

## Sanastark

Curing solution, for powdery bedding plasters, mortars and stones

Reactive solution of mineral silicates, capable of forming binding and stabilizing compounds for hardening and consolidating treatments by reaction with hydrated calcium salts and moisture present in masonry, plaster, stone and concrete. Indicated in the preliminary treatments to the subsequent plastering or smoothing operations, of plasters and powdery mortars and wall casings in general, in green building interventions and in the restoration of period and monumental buildings.

**CUSTOMS CODE:** 3824 9970

**COMPONENTS:** Single-component

**APPEARANCE:** Liquid

**AVAILABLE COLORS:** Transparent

**PACKAGING AND DIMENSIONS:** Plastic can 5 kg - Plastic can 10 kg - Plastic can 25 kg

### FEATURES AND BENEFITS

Sanastark is a solution based on mineral silicates, demineralised water and natural dispersant. It does not contains traces of resins, solvents or thinners. The application of Sanastark does not affect the original wall breathability.

### FIELDS OF APPLICATION

Cortical reinforcement and elimination of pulverisation of mortars, plasters and masonry jointing. Also suitable as a natural fixative before applying lime putty- or potassium silicate-based plasters and paints.

### ALLOWED SUPPORTS

Plasters - Cement-based or lime-based mortars - Bricks - Mixed walls (bricks and stones) - Stone walls

### PREPARATION OF SUPPORTS

Remove the soilings and saline manifestations by vigorous brushing. Then eliminate the residual dust. Saturated with water until you reach the condition of "saturated with dry surface".

### MODE OF USE

Apply by spraying, proceeding from the bottom up: it can also be applied with a brush with natural long bristles. In the presence of pronounced degradations proceed with several applications, wet on wet.

## APPLICATION METHODS

Low pressure airless nebulizer - Brush - Sprayer

## TOOL CLEANING

Water

## KEY FEATURES

-  Density: 1.03 kg/dm<sup>3</sup>
-  Nonflammable
-  Solvent-free
-  Use wearing protective glasses

-  Material 100% eco-friendly
-  Shelf-life: 12 months
-  Temperature of use: +8 / +30 °C
-  Use wearing protective gloves

## CONSUMPTION

From 0.20 to 0.30 kg of Sanastark for each square metre of surface to be treated, based on the porosity of the support.

## STORAGE AND CONSERVATION

Protect from freezing. Store the product in its original packing, in a fresh and dry environment, avoiding frost and direct sunlight. Inadequate storage of the product may result in a loss of rheological performance. Store the product at a temperature between +5°C and +35°C.

## WARNINGS AND PRECAUTIONS

It can cause the opacification of aluminium surfaces, glass, ceramised tiles etc. which must therefore be protected during application. Do not apply on mineral surfaces (plaster, bricks etc.), destined to remain exposed, without carrying out a preliminary test, as there is a risk of latent salt crystallisation. Sanastark is a moderately caustic solution at the implementation stage: do not ingest, wear protective gloves, goggles and clothing, take the necessary precautions.

The general information, along with any instructions and recommendations for use of this product, including in this data sheet and eventually provided verbally or in writing, correspond to the present state of our scientific and practical knowledge.

Any technical and performance data reported is the result of laboratory tests conducted in a controlled environment and thus may be subject to modification in relation to the actual conditions of implementation.

Azichem Srl does not assume any liability arising from inadequate characteristics related to improper use of the product or connected to defects arising from factors or elements unrelated to the quality of the product, including improper storage.

Those wishing to utilise the product are required to determine prior to use whether or not the same is suitable for the intended use, assuming all consequent responsibility.

The technical and characteristic details contained in this data sheet shall be updated periodically. For consultation in real time, please visit the website: [www.azichem.com](http://www.azichem.com). The date of revision is indicated in the space to the side. The current edition cancels out and replaces any previous version.

Please note that the user is required to read the latest Safety Data Sheet for this product, containing chemical-physical and toxicological data, risk phrases and other information regarding the safe transport, use and disposal of the product and its packaging.
