

Squadretta con tasselli

Five-hole bracket with fastening dowels

Five-hole BRACKET in galvanised steel with nylon fastening dowels. It is a fundamental fastening accessory in the RINFOR SYSTEM 1 and 2 to prevent slab detachment.

CUSTOMS CODE: 7326 9060

COMPONENTS: Single-component

APPEARANCE: Connector

AVAILABLE COLORS: Steel

PACKAGING AND DIMENSIONS: Bulk material 1 unit

FEATURES AND BENEFITS

The BRACKET in galvanised steel is used to fasten the ARMAGLASS STRUCTURA mesh where they overlap on the wall in the systems for preventing slab detachment. The dimensions of the bracket are calibrated on the openings of the ARMAGLASS STRUCTURA mesh, thus ensuring effective locking. The DOWEL is made of age-resistant nylon and can be used in a wide range of temperatures (from -40° C to +80° C). The expansion of the DOWEL when inserting the galvanised screw and the effective anti-rotation wing, which lock the dowel within the hole during installation, ensure a robust and tenacious seal, both on solid or concrete bricks and hollow bricks. The DOWEL accessory has a collar around the top that prevents the DOWEL from penetrating the hole. The galvanised screw offers excellent resistance to corrosion. Nylon dowel: Diameter 8 mm — Length 40 mm Colour: Red Zinc-plated Screw: Diameter 5 mm — Length 70 mm Colour: galvanised

FIELDS OF APPLICATION

In preventing slab detachment, the BRACKET is a robust and economical fastening element in the ARMAGLASS STRUCTURA network in the RINFOR SYSTEM 1 and 2.

ALLOWED SUPPORTS

Concrete - Cement-based or lime-based mortars - Wood - Bricks - Brickworks

MODE OF USE

Attach the ARMAGLASS STRUCTURA mesh in the area of overlap in the wall with the specific galvanised steel bracket with five holes, fastening by means of a nylon dowel and galvanised steel screw. The substrate must be dry to allow for an effective hold of the DOWEL. For clarification on the positioning of the BRACKET, see the drawings in our RINFOR SYSTEM 1 and 2 technical literature.

APPLICATION METHODS

To be added to other components - Apply by hand

KEY FEATURES

↔ Length: 120 mm

🧤 Use wearing protective gloves

∞ Unlimited shelf-life

↔ Width: 35 mm

TECHNICAL SPECIFICATIONS

Alkali-resistant material

CONSUMPTION

At least one BRACKET every 50 centimetres or so, with two fastening DOWELS (see RINFOR SYSTEM 1 and 2 in our technical literature).

STORAGE AND CONSERVATION

Avoid contact between the product and acid substances. Store in a covered and sheltered place.
