

Syntech HAG Cleaner

Cleaning agent for specific interventions with water-reactive resins

Cleaning agent specific for the necessary equipment during operations of injections to stop the infiltration of water in the buildings. Oily rinsing detergent, low toxicity, high solvent capacity for non-hardened polyurethanes, to clean and lubricate the internal pumping hydraulic circuits of both manual and electric pumps. It replaces acetone, methylene chloride and other detergents commonly used.

CUSTOMS CODE: 3403 1980

COMPONENTS: Single-component

APPEARANCE: Liquid

AVAILABLE COLORS: Straw yellow

PACKAGING AND DIMENSIONS: Can 10 kg

FIELDS OF APPLICATION

Cleaning the equipment for water-reactive polyurethane injections in the masonry. Removal of the non-hardened polyurethane residues.

MODE OF USE

Upon completion of the operations of injection of water-reactive polyurethane-based masonry products, it is necessary to perform a careful cleaning of pumping equipment before their resting. To this end, first circulate Nitro thinner in the hydraulic circuits of the pump for a few minutes, in order to rapidly dissolve the hardened polyurethane residues. After cleaning the pumping circuits, circulate the specific detergent oil lubricant SYNTECH H.A.G. CLEANER, undiluted, for a few minutes, in the same circuits. A small amount of product must be left inside the pumping circuits in order to keep them lubricated during the resting period of the pump. The estimated consumption will be approximately 2 litres for every clean pump per working day.

APPLICATION METHODS

Pump

KEY FEATURES

-  Density: 1.05 kg/dm³
-  Shelf-life: 12 months
-  Use wearing protective glasses

-  Nonflammable
-  Temperature of use: +10 / +30 °C
-  Use wearing protective gloves

TECHNICAL SPECIFICATIONS

Flash-point **225 °C**

CONSUMPTION

Product to buy as needed.

STORAGE AND CONSERVATION

Protect from freezing. Store the product in its original packing, in a fresh and dry environment, avoiding frost and direct sunlight. Inadequate storage of the product may result in a loss of rheological performance.
